

AUD-ERROR

This is one of the test scenarios we foresee can be difficult to send.

This test scenario is special.

The AUD report has to be sent in a way so that the validation at the sending endpoint does not stop the report

* Please look at the crews.wsdl "requestFault"

AUD-ERROR				Expected response	Accepted date
<i>Test of AUD reports</i>					
MA	RC	TM	Content of the report		
AUD-ERROR		AUD	Missing FR	*	
		AUD	Missing CRN	*	
		AUD	Missing report content (empty report)	*
