

**COE-CON-COX-ERROR**

This is a test of some basic reports

COE-ERROR Start with a COE report and send this again and again until all error codes planned is received

COE-CON-ERROR Next is the CON report, send a COE and a CON until all errors are received

COE-CON-COX-ERROR Next is a COX report, send a COE, a CON and a second CON and a COX all errors are received

Change the colour of the line to green as soon as the version of the report is accepted

Fill in the **Accepted date**

All mandatory elements that are not listed will be filled in with correct values

\*In some cases all values will be tested and in others only some.

This scenario is only to verify that a COE report get the expected error codes
